Ahmed Salih

Software Engineer

Hi there 👋 I'm Ahmed
I'm a student of software engineering at Firat University 👨‍💻,
I'm a backend developer expert with 2 years of experience in
the field, I can quickly create websites using C#, and I can
also create a mobile application with Flutter

Education

Flutter / JAVA
PHP(Laravel)
2023 - 2024

This year was full of huge projects and difficult challenges. One of those projects was an integrated aviation system, and at the same time I had started designing my own application using Flutter , And I learned the Design Patterns & SOLID.
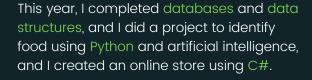

Python / SQL
C#(ASP.NET)
2022 - 2023

This year, I completed databases and data structures, and I did a project to identify food using Python and artificial intelligence, and I created an online store using C#.

C / C++
HTML/CSS
2021 - 2022

This year was the first year at the university, and I began implementing intermediate projects in the C/C++ language. At the same time, I began learning the basics of the web and databases. This year, I was accepted into the university's programming office.

java
2020 - 2021

At the beginning of this year, I started learning the basics of programming and algorithms, and from here my journey in the world of programming began.

Work Experience

◆ Mobile / Desktop Application
2023 - 2024

- Airline Information System
  (JAVA, JFrame , Figma)
- Airline Information System
  (Flutter, Figma)

◆ Deep Learning
2022 - 2023

- Food Detection
  (Python , OpenCv , Robflow)
- Library
  (Asp.net , C# , HTML , CSS , JS , SQL)

◆ Web Application
2021 - 2022

- Shopping site
  (Asp.net , C# , HTML , CSS , JS , SQL)

◆ Desktop Application
2020 - 2021

- Soduko (C/C++)
- Workers management system
  (C++ , OOP)

Skills

Back End Development

Mobil Development

Desktop Development
